

Alternergy Wind One Corporation
Comments on the ERC Draft Rules on Competitive Selection Process

No.	Proponent	Article/Section	Discussion of Comment/s and/or Questions for Clarification
1	Alternergy	Article IV: Sec 13: Publication and Posting	Mandatory publication of the bids at the DOE CSP e-Portal to provide greater dissemination
2.		Article IV: Sec 2: CSP	In the conduct of the CSP, guidelines should be more transparent and an evaluation criteria with respect to the formula template should be made available by the DUs/ECs to the bidders using levelized cost of energy as a final price determination metric. This allows for a transparent and clear basis for bid evaluation. Release of the said guidelines should be part of the Bidding Documents.
3.		Art. V, Section 4	For tariff structure, remove the indexation formula for forex and fuel (Art. V, Section 4). This allows a level playing field in evaluating proposals for all technologies (i.e. as bidders will be submitting realistic pricing for fuel rather than submitting artificially-low fuel prices subject to future indexation adjustments)
4.		Art. 4, Section 4.1	Reduction of the 30-day period to rematch the comparative bid to only 5 days
5.		Art. Iv, Section 2 and 3	Provide a general guideline/terms of reference for unsolicited proposals
