TARELCO I alleged the following in its Application:

1. TARELCO I is a non-stock, non-profit electric cooperative duly organized and existing under and by virtue of the laws of the Republic of the Philippines, with principal office at Amacalan, Gerona, Tarlac;
2. It holds an exclusive franchise from the National Electrification Commission to operate an electric light and power distribution service in the municipalities of Anao, Camiling, Gerona, Mayantoc, Moncada, Paniqui, Pura, Ramos, San Clemente, San

Domingo in Tarlac City, Province of Tarlac; the municipalities of Cuyapo and Nampicuan, in the Province of Nueva Ecija; Barangays Agcano, Bagong Barrio, Bulakid, Caingin Tabing-Ilog, Escano, Lamorito, Maybubon, San Agustin, Yuson, Sitios Boundary, Gragasin I, Gragasin II, Manga & Medina in Barangay San Miguel, Sitio Bertese, Barangay Lennec in the Municipality of Guimba and Sitio Bardias, Barangay Villarosa in the municipality of Licab, likewise in the province of Nueva Ecija.

THE ANTECEDENT RULES AND FACTS

3. In 2009, the Honorable Commission promulgated the Rules for Setting the Electric Cooperatives' Wheeling Rates (RSEC-WR);
4. The RSEC-WR envisioned a regulatory framework whereby an Initial Tariff and a Tariff Glide Path shall be developed for each Electric Cooperative (EC) Group for a Regulatory Period;
5. In the same year, TARELCO I filed with the Honorable Commission an application for approval of its proposed adjustment in rates pursuant to the RSEC-WR, docketed as ERC Case No. 2009 – 114 RC;
6. In the said application, the Honorable Commission granted the cooperative provisional authority to implement the following initial tariffs on its Distribution, Supply and Metering (DSM) Charges, among other charges, at the end of the transition period, to wit:

CHARGES	UNITS	CUSTOMER TYPE		
		Residential	Low Voltage	Higher Voltage
Distribution Charges:				
Demand Charge	PhP/kW			219.68
Distribution System Charge	PhP/kWh	0.5782	0.7595	
Supply Charges:				
Retail Customer Charge	PhP/Customer /Mo		42.92	42.92
Supply System Charge	PhP/kWh	0.6001		
Metering Charges:				
Retail Customer Charge	PhP/Meter/ Mo	5.00	35.94	35.94
Metering System Charge	PhP/kWh	0.4326		

LEGAL BASIS FOR THE APPLICATION

7. Article 7 of the RSEC-WR provides that during the regulatory period, the rate of the ECs per group shall be adjusted using the following formula, to wit:

Tariff x (1+ index "I"-Efficiency Factor "X" + Performance Incentive "S")

The Index "I", shall be an escalation factor to be used in adjusting the rates to reflect the combined impact of inflation and load factor. There shall be an efficiency factor "X" to account for the operational efficiency of the ECs in setting their rates. There shall be a performance incentive "S" which shall reward or penalize the EC for above or below standard performance, respectively.

The TGP is intended as a cap and the EC may move up to the cap, if it is a positive adjustment. If the cap is lower than the current average tariff, a reduction may be implemented.

8. On May 2, 2011, the Honorable Commission promulgated the Tariff Glide Path (TGP) Rules pursuant to the above Article 7 of the RSEC-WR;
9. The TGP is a rate adjustment mechanism which provides an opportunity for the ECs to adjust their rates once every three (3) years. The rate adjustments may occur at the start of the fourth year of the first Regulatory Period and every three years thereafter;
10. Under the TGP, the regulatory period is six (6) years for each entry group. For the Third Entrant Group, the first regulatory period is from January 1, 2013 to December 31, 2018. TARELCO I belongs to the Third Entrant Group;
11. Further under the TGP Rules, the concerned EC shall use the following formula in determining the TGP for the first to third years of the Regulatory Period, to wit:

$TGP_A = TGP_n + TGP_{n+1} + TGP_{n+2}$ where

$TGP_n = I_n - X_n + S_n$

N= the first year of their Regulatory Period and succeeding Regulatory Periods

Except that for the first two years of the First Regulatory Period, "X" will be equal to zero and thereafter shall not be less than zero. The TGP calculated for each of the three years will be summed to determine the possible rate adjustment the starting on the Fourth Year of the current Regulatory Period.

THE PROPOSED RATE ADJUSTMENT

12. Applying the methodology embodied in the TGP Rules, TARELCO I calculated the values of the "I", "X" and "S" and came up with the following results, to wit:

	"I"	"X"	"S"	TGP A	TGP A (Excluding "S")
Year 2013	0.00 %	0.00 %	2.5 %	2.5 %	0.00 %
Year 2014	0.00 %	0.00 %	1.7 %	1.7 %	0.00 %
Year 2015	0.00 %	4.66 %	2.5 %	-2.16 %	-4.66 %
Net Results	0.00 %	4.66 %	6.2 %	2.04 %	-4.66 %

13. Applying the above values resulted in adjustments on TARELCO I's DSM Rates, as follows:

A. WITH PERFORMANCE INCENTIVE "S"

	UNITS	CUSTOMER TYPE		
		Residential	Low Voltage	Higher Voltage
Distribution Charges:				
Demand Charge	PhP/kW			224.15

**ALLEGATIONS IN SUPPORT OF THE PRAYER FOR
PROVISIONAL AUTHORITY**

16. Applicant repleads the foregoing allegations as may be material herein;
17. Applicant's current DSM rates were provisionally granted by the Honorable Commission in three (3) yearly tranches which were started way back January 2010;
18. Over the years, the cost of its operations has significantly increased, not only as a logical effect of inflation as well as certain governmental requirements, but likewise due to the inevitable expansion of its distribution network brought about by the extension of its services to remote areas. More significantly, the cooperative has been implementing the Sitio Energization Program (SEP) of President Benigno Simeon C. Aquino III, such that the

ERC CASE NO. 2015-090 RC

massive expansion of its distribution lines up to the remotest areas has considerably increased its operational and maintenance costs, not to mention the increased system loss which the cooperative is likely to absorb. All these costs were not duly provided for in its current rates and the general funds being generated from its DSM revenues as granted under the RSEC-WR are no longer sufficient to cover these inevitable costs;

19. Thus, the cooperative urgently needs additional funds to be able to cope with the rising costs of its operations;
20. Further, based on the provisions of the TGP Rules, for cooperatives belonging to the Third Entrant Group, their initial tariff shall be adjusted at the start of the fourth regulatory year of the First Regulatory Period, which is January 1, 2016;
21. Considering the foregoing, applicant respectfully prays that while the instant application is pending, it be granted a provisional authority to implement the proposed rates effective January 1, 2016.

COMPLIANCE WITH PRE-FILING REQUIREMENTS

22. Finally, in compliance with the ERC Rules of Practice and Procedure, applicant is likewise submitting herewith the following documents, which are being made integral parts hereof, to wit:

Annex	Nature of Document
I	Affidavit in Support of the Prayer for Provisional Authority
J to J-1	Proof of furnishing copies of the Application to the Sangguniang Bayan of Gerona and Sangguniang Panlalawigan of Tarlac
K to K-2	Proof of publication of the Application in a newspaper of general circulation in TARELCO I's franchise area or where its principally operates

PRAYER

WHEREFORE, premises considered, it is most respectfully prayed of this Honorable Commission that pending evaluation of the instant application or after due notice and hearing, as the case may be, TARELCO I be allowed to implement either of the following two (2) alternative proposed new rates for its Distribution, Supply and Metering (DSM) Charges, effective January 1, 2016, to wit:
